SURVEY OF MOTORISTS UNDERWAY FOR I-93 WIDENING PROJECT
Origin-Destination Study in Salem, Windham, Londonderry and Hooksett

The New Hampshire Department of Transportation is conducting a travel survey of motorists in Salem, Windham, Londonderry and Hooksett to gather information that will assist in the planning of the planned expansion of Interstate 93 between Manchester and Salem.

During the next two weeks, motorists will be asked to fill out and mail back postcards about the trip they are making. This survey will be conducted at several locations in these towns between 6:00 am and 10:00 am.

This survey will update a similar origin-destination survey that took place in 1992.
